Lab 9

1. Array, 1, 1.5, false, nil

2. I like that everything is an object because I like object oriented programming.

3. I think that the advantages outweigh the drawbacks because the priority should be to please the client, and this helps do that by making it easy to understand.

4. I think it helps because they write out the functionality in plain English so it is easier to meet the client's needs.

5. Advantages- it can more accurately describe what the feature does

Disadvantages- it might make it harder for some people to understand
